

## Women's Soccer Archive Information

The women's soccer historical archive was compiled based on available statistics and records from the team's inception in 1985. A player's career totals were only calculated if their season totals were available from each season they played. However, an exception was made if partial season totals were available and the available career total was believed to be accurate. The following describes what records were available or each category.

Note: Game-winning goals are only available beginning in 1996. Penalty kicks and penalty kick attempts are available beginning in 2000.

### Goalie Statistics

The win-loss records of individual goalkeepers are not available in the following years: 1985, 1986, 1989, 1990

### Offensive Statistics

Individual shot totals are missing from 1985-1986 and from 1993-1995

Games played are missing from 1993

Goals, assists and points are available from all seasons played

Per-game statistics were calculated wherever possible for all players
