THE DEPARTMENT OF COMPUTER SCIENCE & THE COMPUTER SCIENCE
GRADUATE STUDENT ORGANIZATION (GSOCS) PRESENT

INVITED SPEAKER SERIES
co-sponsored with GSO and partially paid for by student activity fees

Dr. Steven Loscalzo
Principal Associate Data Scientist, Capital One
Tuesday, November 26th at 1:30, UU room 108

Extrapolating from one data point: a data scientist's career trajectory

Abstract: Are you curious what the difference is between a machine learning researcher and a data scientist? Thinking about your options after graduation? Wondering if what you’ve learned in classes will translate to the workplace? If so, join alumnus Steven Loscalzo (BS, BA '07, MS '09, PhD '12), as he shares his experiences from his time in the field.

Steve will highlight his career journey to date, including stints in the Air Force Research Lab, DARPA, and Capital One. Hear about the transition from machine learning researcher to data scientist (and back again?), and learn what skills come in handy in the current data science landscape. Steve will also share some of the skill differentiators he's observed that will give you an advantage in the workplace. Finally, we'll have an "ask me anything" session with Steve to answer any burning questions you might have.

Bio: Steven Loscalzo is a computer scientist who thinks machine learning is a gateway to a better life. With research and practical expertise across a spectrum of ML techniques, Steve is always on the lookout for the next interesting idea. He has published articles in a number of top venues including KDD, ICDM, and AAAI, and serves on a rotating cast of program committees in the field. A long-time Binghamton University student (BS, BA '07, MS '09, PhD '12), Steve worked with the U.S. DoD for a number of years after graduation, and is now a data scientist at Capital One in Northern VA.

This event is funded by GSOCS, a subsidiary of GSO, using Student Activity Fee funds

Refreshments will be provided!
