When using apartment and residential hall kitchens, please keep in mind the following safety tips so that you, and those around you, can enjoy a safe environment.

PERSONAL PROTECTION

- Keep clothing and hair away from open flames and heating appliances. Avoid wearing long or loose clothing that could come into contact with hot surfaces or flames. Long hair should be confined and tied back.
- Use oven mitts and hot pads when handling heated items.
- Keep pot handles turned in on the range top to avoid accidentally knocking them off.
- Keep lids to the pots you are using handy to smother any possible flames.
- Know the location of, and how to use, the nearest fire extinguisher. Get trained in its use. Do not keep the fire extinguisher next to the stove as you may have difficulty reaching it if the stove is on fire.

APPLIANCE SAFETY

GENERAL SAFETY

- WATCH WHAT YOU HEAT - PREVENT FIRES! Never leave cooking unattended.
- Use caution with electrical appliances. Plug one appliance into an outlet at a time. Do not use extension cords or multi-plug adaptors.
- Have appliances with frayed or cracked cords repaired or replaced before using.
- Keep stoves, ovens, microwaves, and other appliances clean and ready for use. Wipe up spills daily or after each use.
- Turn on the exhaust fan while the oven or stove is in use. If the fan is not working properly, submit a work order to physical facilities.
- Keep hot surfaces and the area around them free of combustibles.

MICROWAVES

- Always read and follow the manufacturers instructions.

DEALING WITH FIRES

PAN FIRES

- Always keep a potholder or oven mitt and lid handy. If a small grease fire starts in a pan, put on an oven mitt and smother the flames by carefully sliding the lid over the pan. Placing the lid from front to back will limit your exposure to the flames and grease. With the lid covering the flames, it is easier to turn off the burner. As long as the lid stays on, the oxygen is cut off and the fire can die out naturally.
- Never pour water on a grease fire and never try to move or carry a burning pan. You can be severely burned by hot grease and can spread the fire.

OVEN FIRES

- Turn off the heat and keep the door closed to prevent flames from burning you and your clothing.

TOASTER OVEN OR MICROWAVE FIRES

- Keep the door closed and unplug the appliance if you can safely reach the outlet.
• **Remember** to always pull the building fire alarm to alert emergency responders and building occupants of a fire situation.

**USING A PORTABLE FIRE EXTINGUISHER.**

• If you know how to safely use a portable fire extinguisher and feel comfortable in using one, you may be able to put out a small contained fire.

• Always pull the fire alarm before fighting the fire.

• When the fire extinguisher is empty, leave the building and meet with emergency responders to describe the event.

**BBQ's**

Please refer to the Safety Check Flyer “Campfires and BBQ’s” for detailed information on the use of grills and cooking outside.
