

Center for Energy-Smart
Electronic Systems

A National Science Foundation Industry/University Cooperative Research Center

ES2 Member Benefits

The I/UCRC in Energy-Smart Electronic Systems offers a unique suite of benefits to its members, including:

- the opportunity to share in Center strategic planning through representation on the Industrial Advisory Board (IAB)
- access to a shared pool of research
- opportunity to conduct research exclusive and confidential to a specific member
- early access to publications, short courses, electronic systems, databases
- Ph.D.-level consultative services
- opportunity for development of business-to-business relationships
- access to PhD-level graduate students, mentoring and recruitment opportunities, workforce training programs, and internships
- access to research equipment, infrastructure and expertise at partner campuses and at the New York State Center of Excellence in Small Scale Systems Integration and Packaging (S3IP), and
- opportunities to develop research partnerships across the I/UCRC network.

ES2 Membership fees are \$50,000/year
