I. Research Working Groups

Articles on the work of various Research Working Groups may be found in the Anniversary issue of Review, X, 1, Summer 1986.

a) Cyclical Rhythms and Secular Trends of the World-Economy

This group is now writing up its research on the two commodity chains of cereal flour and shipbuilding for the period 1590-1790 in the European world-economy.

The earlier work of this group on "incorporation of new zones into the world-economy" has appeared as a special issue of Review, X, 5-6 (Supplement), Summer-Fall, 1987. The study compares the process of incorporation of three such zones: the Caribbean (1650-1690); the Ottoman Empire (1763-1815); southern Africa (1873-1913). This study is available from the center at the cost of $18. Please make checks payable to Research Foundation of SUNY.

The Center co-sponsored an International Workshop on "Technological and Social Factors in Long-Term Fluctuations" in Siena, Italy, Dec. 15-17, 1986. The other co-sponsors were the Gruppo di Ricerca "Ondi Lunghe" of the Univ. de Siena; the International Institute for Applied Systems Analysis, Vienna; and the Science Policy Research Unit, Univ. of Sussex. Giovanni Arrighi presented a paper "Custom and Innovation: Long Waves and Stages of Capitalist Development" (available upon request). The proceedings of the conference will be published.

Other papers presented to the Conference were as follows:

S. Bowles, "Social Institutions and Technical Change"
R. Boyer, "Formalizing Growth Regimes within a Regulation Approach"
M. Di Matteo, "Early Discussion about Long Waves"
G. Ferri, "An Endogenous Infrastructural Investment Cycle"
L. Fontvieille, "The Movement of Capital's Composition"
C. Freeman, "Technical Change and Depression"
S. Gomulka, "Innovation and Growth in the World's Technology Frontier"
R. Goodwin, "Towards a Theory of Long Waves"
G. Grangeas, "Cyclical Behaviour of the Cost of Labour and Long Waves"
G. Hanappi, "The Stages of Industrial Capitalism"
B.A. Lundvall, "Long Waves and the Uneven Development of Capitalism"
S. Menshikov & L. Klimenko, "Long Waves in Economic Structure"
b) Households, Labor Force Formation, and the World-Economy

The group is now writing up its research on a comparison of changing household structures in eight sites in three "regions" of the world-economy (U.S., Mexico, southern Africa), over the period 1870-1970.

Immanuel Wallerstein and Joan Smith presented the research perspective of this group to a session of the American Sociological Association's Annual Meetings in Chicago, August 21, 1987 in a session on "Family and Gender in Comparative Perspective," co-sponsored by the ASA Sections on Family and on Sex and Gender.

c) World Labor

This group is in the midst of empirical research on world-wide patterns of labor protest over the past 100 years.

The group has continued its activities of scholarly exchange with the Institute of International Labour Studies of the U.S.S.R. Academy of Sciences via the ACLS-Academy of Sciences Joint Commission. A colloquium to discuss results of parallel research results on labor protest will be held in Moscow in December, 1987.

On November 16, 1986 the Center co-sponsored with the Newberry Library a joint U.S.-U.S.S.R. colloquium on "Labor in the West: A Haymarket Centennial Conference." Papers of this colloquium are available at $3 each postage included from the Newberry Library, 60 West Walton Street, Chicago, IL 60610. Please make checks payable to the Newberry Library.

d) Southern Africa and the World-Economy

The research of this group focuses on the limits and possibilities of major political actors in the southern African region from 1965 to the year 2000. This work is being done in collaboration with the Centro de Estudos Africanos of the Univ. Eduardo Mondlane in Mozambique.

The group has suffered a deep personal loss (as well as an intellectual setback) in the death of the Director of the CEA-UEM, Aquino de Bragança, who was the direct leader of this particular project on the Mozambique side. He was killed in an aircrash along with Pres. Samora Machel of Mozambique and others.
Issue No. 6 of the Research Bulletin on Southern Africa and the World-Economy appeared in June 1987 and is available upon request. It is a "Tribute to Aquino de Bragança." It contains original and reprinted statements by Mario de Andrade, René Damien, Jacques Depelchin, Gary Littlejohn, Simon Malley, William G. Martin, Jeanne Penvenne, Marcellino Dos Santos, and Immanuel Wallerstein.
