

CULTIVATING A CULTURE OF ACCOMPLISHMENT IN HARPUR COLLEGE

Harpur College fosters discovery and Innovation through faculty scholarship. This scholarship is expressed in many forms; scholars demonstrate their expertise through the publication of books, journals, peer-reviewed articles, securing external funding for research and fellowships, performances, creative works, intellectual lectures, and services to external agencies. This has been an outstanding year of accomplishments for Harpur College faculty. The information highlighted in this booklet reflects only a fraction of the diverse forms of scholarship that our faculty members are engaged in.

We are delighted to celebrate the accomplishments of our colleagues in Harpur who have been successful in achieving these laudable forms of scholarship during 2014. We are continuing to expand our college-wide “Culture of Accomplishment” initiative by highlighting a broader range of faculty accomplishments giving you a sense of the high level work and productivity of our scholars across all divisions of the college.

This year, we are expanding our “Culture of Accomplishment” initiative and highlighting a broader range of faculty accomplishments than we have previously done. Books and

articles were published across all divisions as well as many faculty receiving grants and fellowships. Faculty exhibited their creative works at museums, galleries, and film and video festivals around the world.

During 2014 several million dollars were secured from various sources to support research. Our graduate and undergraduate students also benefit from these resources through research experiences and the passion and enthusiasm for these research topics that the faculty members bring to the classroom. This creates an academic environment of research and teaching that demonstrates the rich tradition of excellence on which Harpur was founded.

Please join me in congratulating all of our colleagues for their demonstration of excellence.

Elizabeth DiGangi, admitted to the status of Diplomate-American Board of Forensic Anthropology, there are currently 71 practicing Forensic Anthropologists who carry this distinction since its inception in 1977.

Doug Holmes, *Economy of Words: Communicative Imperatives in Central Banks*, University of Chicago Press.

"Based on careful empirical research, analytical rigor, and intellectual imagination, Douglas R. Holmes challenges and enriches his reader on every page. Opening new avenues for research and understanding, this book will become required reading for all serious scholars and students of political economy." — Peter J. Katzenstein, Cornell University.

"Douglas R. Holmes has performed a uniquely important service by probing the professional intimacy of the banking world... Holmes's elegantly crafted, deeply informed, and wickedly critical analysis demonstrates how the economists' rhetoric and narrative strategies shape, rather than follow, the realities of today's wildly unpredictable global economy." — Michael Herzfeld, Harvard University.

“This is a welcome replacement for the ever-popular and out of print *Devonian Paleontology of New York* (PRI, 1994) by David Linsley. The historical notes on early New York Devonian paleontologists are an interesting read and the section on facies — while short — gives useful background. An aspect that I particularly like is the brief summaries of diagnostic/typical features of each species; these are quite helpful for those who want to dig a bit more deeply into what makes taxa distinctive beyond the gestalt appearance. A great many amateurs, students, and professionals will find this a highly useful sourcebook.” — Carlton E. Brett, Professor of Geology, University of Cincinnati.

CINEMA

Vincent Grenier, *Watercolor*, HD Cinema, 12:37 min. color, stereo. Self Produced. First Prize in the Experimental Category. 2014 Athens International Film and Video Festival, The Athena Cinema, Athens Ohio and also received the Jury's Stellar Award (Grand Prize) for Experimental Work, 33rd Black Maria Film & Video Festival, Ingals Recitals Hall, New Jersey University, NJ.

"In *Watercolor* Vincent Grenier reveals something we all know, but continually forget: the world is always making movies. Flows of reflection, contingencies of light, movement within frames surround us. But it takes a filmmaker of vision and an ability to linger to reminds us of this essential fact of our visual world. Color flows, light glints and patterns of amazement superimpose themselves in layers of viscous sight. A wonder to behold. This is I think (his) masterpiece and one of the most beautiful films I know." — Tom Gunning, Distinguished Professor, Department of Cinema and Media Studies, University of Chicago.

Followed by tour with confirmed screenings including: Rhode Island School of Design, Providence, RI, Berks Filmmakers at Albright College, Berks PA; University of Colorado/Naropa University, Boulder; Virginia Commonwealth University, Richmond; New York Public Library for the Performing Arts; National Gallery of Art, Washington, DC.; Onion City Film Festival, "Wandering Pausing" Ferguson Theater, Columbia College, Chicago, IL.

- The Girls in the Chartreuse Jackets* by Maria Mazziotti Gillan is a wondrous collection of poems and paintings that evokes the fire of being alive. There is relationship everywhere: the relationship between the seer and the world, between the woman speaker and her body—this is a woman-to-woman voice that embodies courage in these deep, moving poems.... This bravery, this feminism breathes through the women in her paintings ... I love the sense of space ... giving these women room to move and also creating a feeling of possibility. — Jan Beatty.

“In an interesting essay that takes Pietro Aretino’s own ‘play with transgression’ and the bawdy traditions of street theatre as models, Paul Schleuse delves into a group of five-voice pieces by composer Orazio Vecchi from the later sixteenth century. In particular, he introduces the reader to a dialogue variation on ‘Knock knock! Who’s there?’ that rapidly moves from stock comedy at the beginning to ‘obscene performance’ by the end. The text is witty, and the polyphony fun to sing. ... The contributors to this volume provide a series of vivid episodes that enliven our appreciation of the differences, as well as similarities, between explicit expression both early and modern.” — review by Marlene Eberhart in *Renaissance Studies*.

Nicole Hassoun developed an index ranking the world’s largest pharmaceutical companies according to their impact on global diseases. The Global Health Impact Index measures three factors: the need for several important drugs for three specific infectious diseases: tuberculosis, HIV/AIDS and malaria; the effectiveness of the available treatments; and the number of people who can access those drugs. The rankings estimate the amount of death and disability the drugs are alleviating.

“In this remarkably original book, metaethics, empirical moral psychology, political philosophy, and feminist theory fall into place like puzzle pieces, revealing a neglected and profound problem for moral agency: the inevitability of our own moral failure. The message is sobering, but never despairing and it serves as a welcome corrective to theories of moral deliberation that are overly idealistic or simplistic. Tessman sets an exemplary standard by forging a theory that is attentively and insightfully grounded in actual evaluative practices.” – Jesse Prinz, The Graduate Center, City University of New York.

“In an age when everyone in clinical psychology claims that their practices are based on scientific evidence, it is imperative that we know what scientific evidence means and how to use it—but that task is not always as easy as it may seem. The second edition of this stunningly good book walks us through the major controversies in our field and methodically discerns fact from myth. Thoroughly updated throughout, and with new chapters on attachment therapies and questionable treatments for childhood and adolescent antisocial behaviors, this book should be required reading for every student of clinical psychology.”—David H. ROMANCE LANGUAGES

Chesla Ann Bohinski's second language (L2) Spanish students from Binghamton University and Professor Venegas' L2 English students from UDEM are in the process of completing instructor-created activities over the course of six weeks in order to explore culture and the university life in one's own country and in the country of the partnering institution. Collaborations being made between students and their instructors are showing that teamwork and technology knowhow and flexibility are paramount in an online partnership. An article will be published once all data is collected as well as a presentation given at the 7th Annual COIL.

Sandro Sticca, *S. Eustachio Martire* Santo Bizantino, Parma-Roma, Studies in Christian Thought and Tradition.

The Byzantine saint Eustace was a Christian who suffered martyrdom under the emperor Trajan. Sticca studies the development of the cult of this early Greek-Byzantine martyr whose vita became very popular within the Latin Christian world, becoming celebrated in iconography from the early sixth to seventh centuries in Cappadocia and through the twelfth, thirteenth and sixteenth centuries in Europe. Sticca tries to separate the legendary and apocryphal elements from the historical reality of the general Placidus-Eustathius. Three authorities on Christian spirituality — Don Michele Persichitti, Antonio Varasso and Professor Vincenzo Centorame — centered a colloquium on Sticca's book on Aug. 10, in the city of Casauria (Abruzzo).
