**PERSON UID / ENTITY:**

Person Uid and Entity Uid, refers to a field name contained in most of the student, faculty, and staff based data tables in Hyperion. This field name contains a unique record number for every student, faculty and staff member here at Binghamton. The primary use for the Uid is for joining tables. The Uid is almost always found at the top of the table. Typically Uid is only added to the request line for use in a derivable query.
