

License Event Notification Consent Form

The status and validity of a driver's license must be verified in order to operate a State owned/leased/rented vehicle. The New York State Department of Motor Vehicles has such a program called LENS (License Event Notification Service). By completing this form below, you will be giving the University permission to seek this verification.

I, _____, hereby authorize the University to verify my driver's license information. This is a Department of Motor Vehicle record check to determine my eligibility to drive a New York State owned, leased or rented vehicle. I also certify that I do not have a physical/medical condition that would impair my ability to operate a vehicle.
