Summer Construction
2013
East Campus Housing

- 2008–2013
- 1,139,466 square feet
- Eight residential halls, one collegiate center, one garage
- Outdoor recreational facilities
East Campus Housing

Great room

Kitchen
Two projects are renovating the north portion of the UU
- The food court and Susquehanna room areas are being merged to create an open marketplace venue
- Renovated areas in other north portions of the UU will house several key student services
- The projects will be complete in January 2013.
University Union Renovations

Food Court area during construction
One classroom was created from lounge space in Old Rafuse. One classroom was constructed in Old Digman. These classrooms seat 36 students each.
Classroom Additions in Old Dickinson Buildings

- Landscaping improvements also took place at the building entrances

Before

After
The project will transform the former dining hall into a student services center for the University.

- Offices for student accounts, the registrar, financial aid and admissions recruiting will be relocated there.
- The project involves adding 13,000 square feet to the existing building.
- Completion expected in summer 2014.
Dickinson Hall Renovation

- Renderings
Old O’Connor/Johnson Renovations

- Office space will be created in Old Johnson for Information Technology and Geography
- Old O'Connor will house External Affairs functions such as the Foundation. An alumni lounge will also be created in this building. The project includes a connector between Johnson and O'Connor that will provide a common entry for both buildings
- Work will wrap up in late 2014
Old O’Connor/Johnson Renovations

Exterior

Alumni Lounge
This project involved renovating about 2/3 of the third floor of the Engineering Building and provided new office, lab, classroom and conference space for the Watson School.

New restrooms and mechanical systems were also part of the project.

The project is complete.
Center of Excellence

- Much of the exterior work has been completed and the contractor is focused on advancing the interior spaces.
- The two-story, 114,000 square-foot facility will connect with the Biotechnology Building and the Engineering and Science Building at the Innovative Technologies Complex.
- Completion is scheduled for August 2014.
A section of high temperature hot water line was replaced between Science 2 and Science 3

- The project included a new high temperature hot water line, new electrical duct bank and removal of above ground high temp hot water lines
- Other associated work involved removal of the concrete wall and bench along Science 3, resetting pavers along Science 3 and landscaping
HTHW Line Replacement

During construction, September 2012

After construction, September 2013
This project renovated rooms on the 3rd floor of the Fine Arts building to studios and a meeting room for graphic arts.
Restroom renovations took place in Fine Arts, the Anderson Center and Administration Building.
Site Lighting Improvements

- Road and walkway lighting was upgraded in several locations including Glen G. Bartle Drive and the walkway to the Innovative Technologies Complex.

Before

After
Landscape improvements took place near the Lecture Hall and Library pedestrian bridge.

Before
