Recycling Program Volunteers and Internships

Are you interested in making our campus “greener”? Want to build your resume and earn class credit while working to preserve our environment? Then become an intern/volunteer for the Office of Recycling and Resource Management.

The success of our program relies heavily on the students that work with our office. We need students to help us organize and carry out sustainability initiatives as well as to educate others on campus and in the surrounding community. This includes collecting the various recycling waste streams on campus, creating educational displays, tracking recycling weights, planning the Earth Day celebration, tending to the Pre School, Science 1 garden, and much more. As a part of the recycling team your ideas will be valued and put into action.

Work schedules are flexible and can be built around your class schedule. Students looking to work with recycling pick-ups must be reliable, able to lift 50-100 lbs on a regular basis, maintain a valid driver’s license, and have 2-3 hour blocks of time available to make recycling pick-ups. Those who do not meet these criteria are still encouraged to apply to work for the program in another capacity.

To apply, please send the following information to recycle@binghamton.edu with “Recycling Internship” and the semester/year you are applying for in the subject line:

Resume- Please label (YourName_Resume) E.g. JohnDoe_Resume

Class Schedule - Please give additional info on any likely changes

Do you have a valid driver’s license?

Can you lift up to 100 lbs regularly?

Year – (freshman, sophomore, etc.)

Major Concentration and any Minors

If you have any further questions about the program feel free to contact Martin Larocca at recycle@binghamotn.edu.
