Pfizer Student Summer Worker Q&A Webinar

Wednesday, January 30th
1:00PM - 2:30PM
UU325

Impactful Work Experience For College and University Students

Join us to learn more about the Pfizer Summer Student Worker Program! The program, which offers summer employment opportunities at various Pfizer sites in the U.S., is designed to help Pfizer businesses and teams accomplish real, impactful projects, while giving students engaging and meaningful work experience.

All Pfizer businesses and supporting divisions accept summer student workers, and Pfizer works to match students with the department or team that most closely matches their future career interests. During the summer, students will receive challenging work assignments, have the opportunity to collaborate with Pfizer colleagues at all levels of the organization and experience Pfizer’s culture firsthand.

Summer workers are evaluated with seriousness, and students receive valuable feedback that can help them develop their skills and competencies. Many student workers form long-term relationships with mentors, advisors and peers.

Pfizer applies science and global resources to bring therapies to people that extend and significantly improve their lives. They strive to set the standard for quality, safety and value in the discovery, development and manufacture of health care products. Their global portfolio includes medicines and vaccines as well as many of the world’s best-known consumer health care products.
