Bing-HFES brings a PhD funding opportunity right to your door!!!

Bing-HFES is a Student Chapter for Human Factors and Ergonomics Society at operating under the guidance of SSIE Department in Watson School of Engineering and Applied Science. It works towards helping the student body at Binghamton University become better Professionals.

Bing-HFES is informed about a potential funding opportunity for a PhD student at Virginia Cognitive Systems Engineering Lab (VACSE Lab) at Virginia Tech. Read more for details.

“Virginia Cognitive Systems Engineering (VACSE) Laboratory at Virginia Tech is recruiting one PhD student starting on January 2018. The selected candidate will be working on a 3-year project funded by Department of Energy. The project investigates interface design and visualization of complex outage schedules to support decision makers in adjusting work activities under high time pressure. The candidate should ideally be knowledgeable in interface design, engineering psychology and be a US citizen/person.”
