

Startup opportunity | Generation Vote : Generation Vote

Generation Vote, a student-driven startup based in Binghamton, is seeking a Chief Technology Officer (CTO) to oversee the development of an online civic engagement platform and related app. Our organization aims to educate, mobilize, and connect students who want to get involved in campaigning and advocate for youth issues, especially those related to civic engagement. To accomplish this, we aim to develop an application which can help our teams manage data, coordinate their efforts, share information, and distribute training materials. The application should be able to facilitate these activities as well as empowering our teams to manage data related to youth engagement and field organizing. The CTO will be the primary developer of this application and will oversee all engineering and digital technology operations for Generation Vote. If you are interested in this position, please email a resume to generationvoteusa@gmail.com.

-- Since we are a new startup, the student has the opportunity to hold a high-level position within the organization as our Chief Technology Officer (CTO). We are also looking at opportunities to apply for fellowships with technology accelerators for our startup. We are currently fundraising and would be able to compensate the student with a stipend at the end of the semester.

Credit can be given if need for this opportunity
